SAN ANTONIO, Tex., Jan. 20—
An army of mosquito-eating bats, several thousand strong, will be turned loose in San Antonio next month. If, as has been predicted for it, the army succeeds in crippling seriously the activities of the germladen mosquito population, many other cities may follow San Antonio's example, and establish their "municipal bat roosts."

Dr. C. A. R. Campbell, who has
made a special study of bats, is responsible for San Antonio's bat roost.
The institution came into existence
last spring. It was not a success in
its first year owing to the fact that
it was established late in the spring,
and its population was not numerous enough. This spring there is a
large army of bats on hand and it is
expected to get an early start.
